

# Model Fairness Assessment

Governance Committee Report

Test Model - Chart Verification v1.0.0

2026-01-08

---

## **ADVISORY ASSESSMENT**

This is an advisory assessment based on statistical analysis of the test dataset.  
Final deployment decisions rest with the governance committee.

# Executive Summary

---

## Issues Near Threshold

7 metric(s) near threshold

0

WITHIN THRESHOLD

7

NEAR THRESHOLD

0

EXCEEDED THRESHOLD

### Key Findings

The model's ability to distinguish between outcomes **requires review**.

Model calibration is **acceptable** but could be improved.

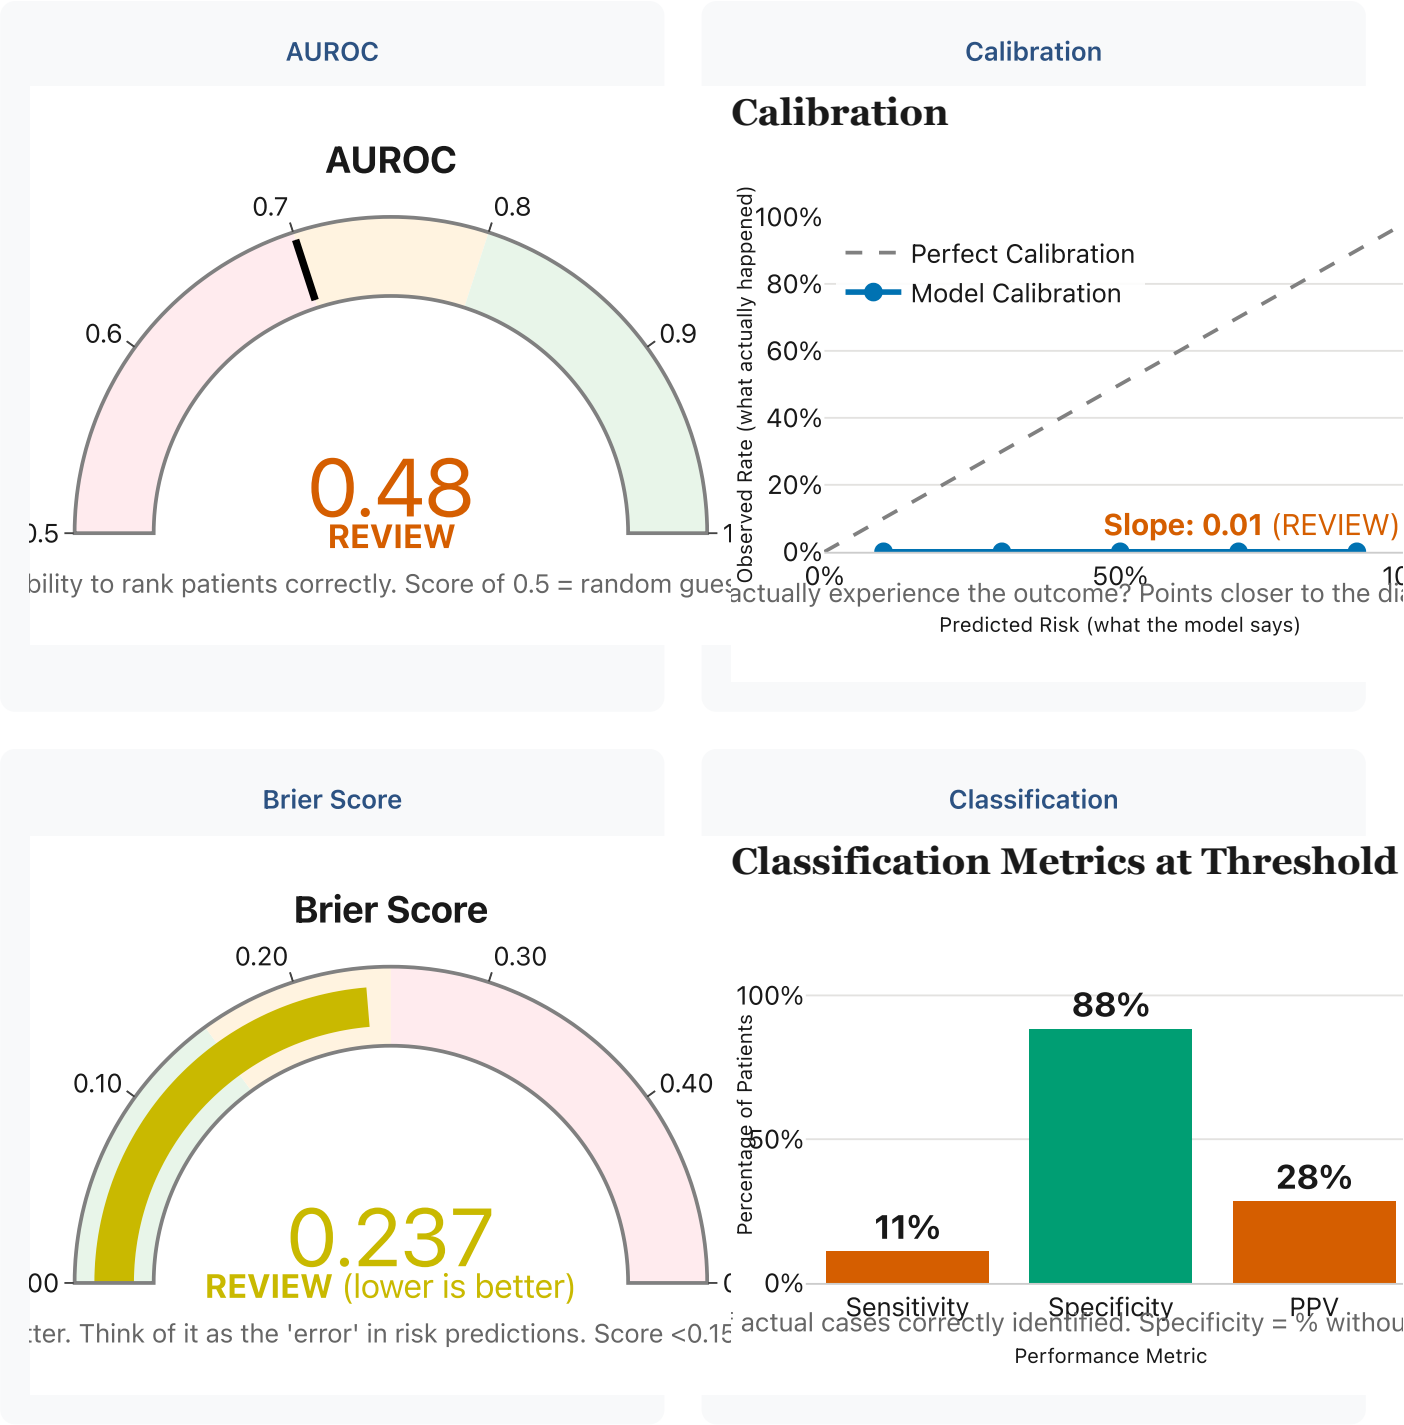

**7 fairness metric(s)** detected near threshold.

Sample size (N = 400) is limited; results should be interpreted with caution.

*This assessment provides advisory guidance based on the CHAI RAIC framework. Final deployment decisions rest with the governance committee and clinical stakeholders.*

# Overall Model Performance

Four key metrics evaluating model discrimination and calibration:

# Subgroup Performance

Performance comparison across demographic groups defined by the data scientist:

## Race

## Sex

AUROC by Subgroup

Model Accuracy (AUROC) by Demographic Group

Sensitivity by Subgroup

Sensitivity: % of Actual Cases Detected by Group

FPR by Subgroup

False Alarms: % Incorrectly Flagged by Group

Selection Rate by Subgroup

Intervention Rate: % Flagged as High-Risk by Group

## Governance Decision

---

**Model:** Test Model - Chart Verification v1.0.0

**Intended Use:** Not specified

**Intended Population:** Not specified

### Decision

- ☐ APPROVE for deployment
- ☐ APPROVE with conditions
- ☐ DEFER pending additional review
- ☐ DO NOT APPROVE
